White Balance

Set based on lighting conditions:

- Auto White Balance (AWB): Usually reliable
- Incandescent, Fluorescent, Daylight, Cloudy, Shade: For specific lighting

Adjusting white balance ensures accurate color reproduction.

Focus Settings

The D40x uses a 3-point AF system:

- Single-Point AF: For precise focusing on a specific subject
- Dynamic-area AF: For moving subjects, with focus point selection
- Auto-area AF: The camera automatically selects focus points

Metering Modes

Determine how the camera measures exposure:

Introduction to Probability and Statistics

Probability and statistics are fundamental branches of mathematics that deal with data analysis, uncertainty, and inference. Whether you're a student preparing for exams, a data analyst working with large datasets, or a researcher designing experiments, having a solid grasp of core concepts, formulas, and methods is essential. This cheatsheet provides an in-depth overview of key topics, formulas, and principles in probability and statistics to serve as a quick reference guide.

Basic Concepts of Probability

What is Probability?

Probability quantifies the likelihood of an event occurring, expressed as a number between 0 and 1.

- Range: $0 \leq P(E) \leq 1$
- Interpretation:
 - $P(E) = 0$: Event is impossible.
 - $P(E) = 1$: Event is certain.
 - $P(E) = 0.5$: Event is equally likely to occur or not.

Fundamental Probability Rules

- Complement Rule:

$$P(\text{not } E) = 1 - P(E)$$

- Addition Rule (for mutually exclusive events):

If E and F are mutually exclusive, then

$$P(E \cup F) = P(E) + P(F)$$

- General Addition Rule:

$$P(E \cup F) = P(E) + P(F) - P(E \cap F)$$

- Multiplication Rule (for independent events):

If E and F are independent, then

$$P(E \cap F) = P(E) \times P(F)$$

- Conditional Probability:

$$P(E|F) = \frac{P(E \cap F)}{P(F)}, \text{ provided } P(F) > 0$$
